

FUNMULAS*

$2B \vee (\perp 2B) = ?$ --Hamlet's soliloquy, Shakespeare

$c O G 1 t O, \therefore \Sigma$ --Descartes

The > things ↻, the > they stay =.

Genius = 1%  + 99% . --Edison

$E = mc^2$ --Einstein

[Means that any amount of "mass" (i.e., matter), measured when it is at rest, corresponds to an enormous amount of energy, which is independent of the composition of the given type of matter. The energy E is measured in Joules, the mass m is measured in kilograms, and the speed of light** is measured in metres per second.] ***

(** $C^2 = 89,875,517,873,681,764 \text{ m}^2/\text{s}^2$)

$t = Au$ --King Midas
